Re: Harbour Hill Condominium
Fire Alarm
GEI Project # 10013

Dear Ms. Caviness:

The purpose of this letter is to provide written certification of the work recently completed to install a code compliant fire alarm system in the Harbour Hill Condominium.

The fire alarm system upgrade to your building was engineered to meet the requirements of NFPA 72, National Fire Alarm and Signaling Code, 2002 Edition. As the design engineer of record, we have reviewed the installation of the fire alarm system and supporting mechanical systems provided the Contractor. The installation meets the intent of the drawings and specifications for compliance with NFPA 72. For reference, a set of "as built" drawings and closeout documentation that fully describe the work performed have been provided to your Building Committee representative.

Sincerely,

Joseph H. Griner III, P.E., LEED AP
President
FL PE # 39491 Dated: 09-30-2011
